Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Currently Amended) A method of creating a collection of relevant video segments (201) by selecting respective portions (202-214) from a video stream, wherein the video stream (200) which corresponds to a program of audio-video information, a first duration of the collection of relevant video segments (201) being relatively short compared with a second duration of the program, the method comprising:

- receiving a signal containing transcript information associated with the program, the transcript information comprising including a plurality of sentences;

- detecting from the signal containing transcript information a first exclamatory syntactical element in a first one of the sentences, the first exclamatory syntactical element for identifying catchy and interesting video segments to be included in a video preview;

- selecting a first one of the portions (202) from the video stream (200), which corresponds correspond to the first exclamatory syntactical element; and

- associating the first one of the selected portions (202) with a first one of the relevant video segments, and

generating the video preview in the form of a video trailer or video abstract comprised of the collection of relevant video segments, wherein the respective selected portions from the video stream make up the collection of relevant video segments of the video preview that can be used as an overview to browse the program of audio-video information and provide a way to select from various recorded programs which ones to watch.

2. (Currently Amended) A method as claimed in claim 1, wherein a first exclamatory syntactical element is one selected from the group consisting of: exclamation mark,

word being expressed with capitals, sentence comprising words being expressed with capitals, word being expressed with underlined characters, word being expressed with italic characters, word being expressed with bold characters, and word being expressed with relatively large characters compared with other characters in other sentences.

3. (Currently Amended) A method as claimed in claim 1, wherein the transcript information is one of closed-captioned text, subtitles being exchanged by means of teletext, and subtitles being exchanged as overlaid text.

4. (Currently Amended) A method as claimed in claim 1, further comprising filtering out relatively short sentences of the transcript information, wherein the relatively short sentences comprise comprising a first word being equal to a second word of a particular set of words.

5. (Original) A method as claimed in claim 4, wherein the particular set of words comprises the words "yes", "no" and "thanks".

6. (Currently Amended) A method as claimed in claim 1, further comprising changing the an order of the respective selected portions in the collection of relevant video segments, for reducing a probability that too much of a story of the program is revealed by the video preview.

7. (Currently Amended) A video segment compilation unit (108) for creating a collection of relevant video segments (201) by selecting respective portions (202-214) from a video stream, wherein the video stream (200) which corresponds to a program of audio-video information, a first duration of the collection of relevant video segments (201) being relatively short compared with a second duration of the program, the video segment compilation unit comprising:

-       receiving means (118) for receiving <u>a signal containing</u> transcript information

associated with the program, the transcript information ~~comprising~~ <u>including</u> a plurality

of sentences;

-       detecting means (120) for detecting <u>from the signal containing transcript</u>

<u>information</u> a first exclamatory syntactical element in ~~a first one of~~ the sentences<u>, the</u>

<u>first exclamatory syntactical element for identifying catchy and interesting video</u>

<u>segments to be included in a video preview</u>;

-       selecting means (122) for selecting ~~a first one of the~~ portions (202) from the

video stream (200)<u>,</u> which ~~corresponds~~ <u>correspond</u> to the first exclamatory syntactical

element; ~~and~~

-       associating means (124) for associating ~~the first one of~~ the <u>selected</u> portions

(202) with ~~a first one of the~~ relevant video segments<u>; and</u>

        <u>generating means for generating the video preview in the form of a video trailer</u>

<u>or video abstract comprised of the collection of relevant video segments, wherein the</u>

<u>respective selected portions from the video stream make up the collection of relevant</u>

<u>video segments of the video preview that can be used as an overview to browse the</u>

<u>program of audio-video information and provide a way to select from various recorded</u>

<u>programs which ones to watch</u>.

8. (Currently Amended) A video storage system (100) comprising:

-       a receiving unit (102) for receiving a video stream ~~(200)~~;

-       storage means (106) for storage of the video stream (200) and for storage of a

collection of relevant video segments (201) being selected from the video stream ~~(200)~~;

and

-       a video segment compilation unit (108) for creating the collection of relevant

video segments ~~(201)~~, as claimed in claim 7.

9. (Currently Amended) A video storage system (100) as claimed in claim 8, wherein the storage means comprises a hard-disk.

10. (Currently Amended) A video storage system (100) as claimed in claim 8, wherein the storage means is arranged to store the video stream (200) on a removable memory device.

11. (Currently Amended) A video storage system (100) as claimed in claim 10, wherein the removable memory device comprises an optical-disk.

12. (Currently Amended) A computer readable medium embodied with a computer program product to be loaded by a computer arrangement, comprising instructions to create a collection of relevant video segments (201) by selecting respective portions (202-214) from a video stream, wherein the video stream (200) which corresponds to a program of audio-video information, a first duration of the collection of relevant video segments (201) being relatively short compared with a second duration of the program, the computer arrangement comprising processing means and a memory, the computer program product, after being loaded in the memory for execution by the processing means, providing said processing means with the capability to carry out:

-       receiving a signal containing transcript information associated with the program of audio-video information, the transcript information comprising including a plurality of sentences;

-       detecting from the signal containing transcript information a first exclamatory syntactical element in a first one of the sentences, the first exclamatory syntactical element for identifying catchy and interesting video segments to be included in a video preview;

-       selecting a first one of the portions (202) from the video stream (200), which corresponds correspond to the first exclamatory syntactical element; and

-         associating ~~the first one of~~ the <u>selected</u> portions ~~(202)~~ with ~~a first one of the~~ relevant video segments<u>, and</u>

<u>generating the video preview in the form of a video trailer or video abstract comprised of the collection of relevant video segments, wherein the respective selected portions from the video stream make up the collection of relevant video segments of the video preview that can be used as an overview to browse the program of audio-video information and provide a way to select from various recorded programs which ones to watch</u>.
